Usability Test

Question #1: What kind of responsibilities and tasks do I do for TSPi and when did I start working there?

Answer:

Question #2: Based on my previous research, what is the most used digital music platform currently?

Answer:

Task #1: Set up a sample email draft to me using the site

Review and Feedback

Where you able to answer all the questions and perform the task easily? If so or if not, explain what aspects were or were not working well:

Think about this site in the context of what it's trying to do/give the user (you). Do you feel it functioned well/as intended from a content/information aspect? What could be added, functionally or in terms of content that would improve it?

Did you find the website accessible from a usability and design standpoint? Did you have any problems navigationally that tripped you up at all?
